<b>Stage 1: Desktop Review</b>	
<b>1.1 Flood History (include review of Floodmaps.ie)</b>	<p><b>River Flow Path</b> Portumna is on the right bank of the Shannon as it enters Lough Derg. There are two tributaries to the Shannon that flow through Portumna in a south easterly direction towards the Shannon / Lough Derg.</p> <p>Portumna is served with a five-span road bridge over the River Shannon. A number of harbours are located in the area. These are Connacht Harbour, which is beside Bridge Road, on the eastern side of the town, and Portumna Harbour which is on the northern shore of Lough Derg beside Castle Avenue, on the southern edge of the town.</p> <p><b>Flood Event Records</b> Five flood records are listed in floodmaps.ie. The most recent of which includes the 2009 flood event on the River Shannon. Events in 2006, 1994 and 1954 are also recorded.</p>
<b>1.2 Relevant information on flooding issues from OPW and LA staff</b>	<p><b>PFRA database comments (<i>in italics</i>):</b></p> <p><b>OPW comments</b> <i>Ref also 253160 (which is set as a duplicate). <b>2.3 Local knowledge - on-site comments (OPW, LA and any info volunteered by local residents during visit)</b>	<p>An ESB representative was met on site informally. He confirmed ESB is maintaining the flood defence on the right bank of the Shannon. The floodplain behind the flood defence is drained by a network of ditches which are pumped into the Shannon. The pumping station is ESB asset.</p> <p>Local resident confirms flooding lasted at least 3 weeks in Nov 2009. He also mentioned localised flooding on St Joseph Rd from a tributary. A B&amp;B by the road bridge was flooded.</p>		
<b>2.4 Comments on hydraulic constrictions (bridges, etc.) and conveyance routes</b>	<p>N65 road bridge across Shannon and upstream of Lough Derg. Multi-span (rectangular openings) with steel parapet and low soffit level. There is a movable span to allow navigation along the Shannon, which is opened at fixed times every day.</p>

<b>Summary Comments (if required)</b>	Portumna has a history of flooding. The PFRA mapping predicts an ongoing significant flood risk with this conclusion supported by both the Local Authorities and the OPW. Portumna was confirmed as an APSR following a desk based assessment with no on-site verification required.
